## Community Engagement Key questions

As programs, ideas, policies, processes, and etc. are brought to the table, we consider our resources and opportunities. These key principle questions can assist the teams in determining both resources and opportunities are used wisely.

- Can it be linked to the current community health needs determined by the Community Health Needs Assessment | Mayo Clinic Health System Albert Lea-Austin?
- Does it engage, equip, and/or empower? (e)NGAGE | QUIP | MPOWER
- Does it positively impact reducing Adverse Childhood Experiences (ACEs)?
- Is it solution-focused?
- Is it sustainable with limited resources?
- Can it be duplicated/shared easily?
- Can we engage other community partners to develop and implement?
- Are there successful programs already addressing that we can partner with?
- How will we measure for impact?
- What is going well and how can we grow more of what is showing promise?
- How does it address/impact/support varying personalities?
- Do we have the appropriate voices at the table and are they honored?
- Does it grow both capabilities AND capacity?
